

Senator Dean Heller, Republican leadership, and the White House have made it their mission these last three months to prioritize legislation that would gut the ACA, take access to reproductive health care away from millions, and “defund” Planned Parenthood. Senator Heller has consistently dodged his constituents’ concerns on these issues and his approval rating reflects just that.

After months of wondering when and if Dean Heller would host an in-person town hall the constituents of Northern Nevada will finally have a chance to have their voices heard. There are two events scheduled for Monday, April 17th 2017 and we want to pack them both with all of our supporters!
